

## About Direct Fencing Supply

At Direct Fencing Supply, we are a distributor of high quality building materials with our specialty being the Premium Vinyl Fencing line. Our Head Office is located in Martensville, Canada, and we currently have authorized dealers throughout Western Canada. We offer over 30 different styles of vinyl fencing with multiple height and colour options. If we do not have fence style you're looking for, one can be created for you with the help of our design team.

Our promise is to provide high quality products and exceptional customer service. We ensure this through the use of quality control checks and continual research into new technology and products. Our customers are our number one priority and we are here to serve you. Our support staff is available to help with any question you may have.

## Technical Data

We use essential additives needed to keep your fence looking beautiful. These include UV inhibitors, impact modifiers and non-chalking titanium dioxide (min. 10 parts/100). These are "expensive" additives and not always used in more economical vinyl products.

We use both mono-extruded and ASA co-extruded to offer the best fencing for our customers. All of our colours and woodgrain fencing use the ASA co-extruded vinyl to provide the best fade protection available. Our white profile are made using mono-extrusion.

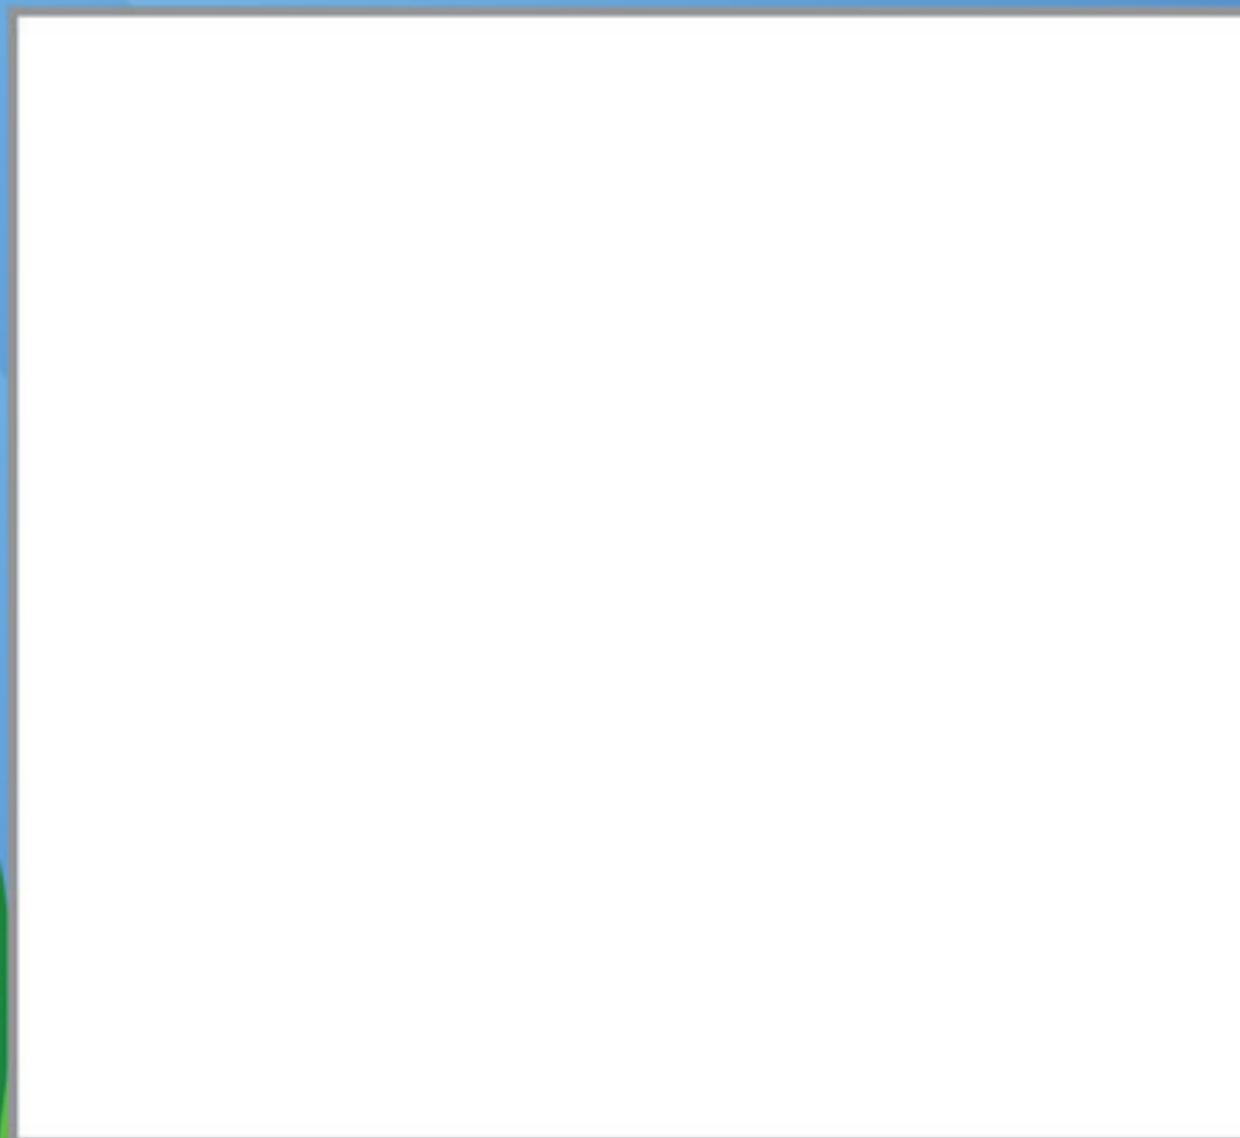

Our mission at Direct Fencing Supply is to offer our customer a fence they can be proud of for years to come.
