

# 4 X 4 SET UP INSTRUCTION

## TOP VIEW

## SIDE VIEW

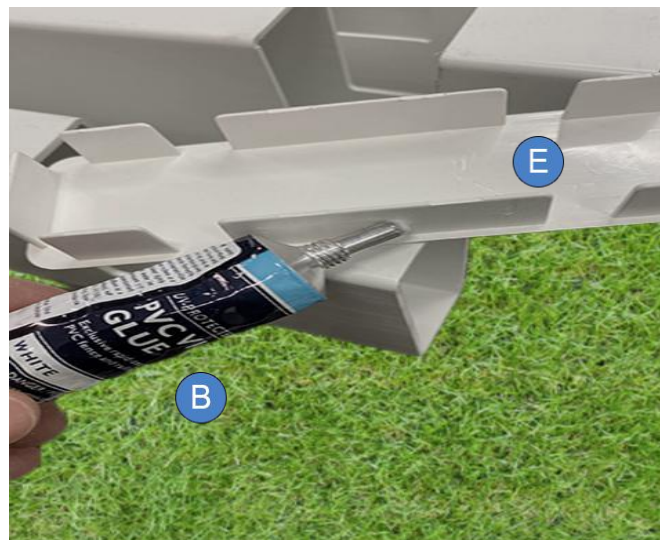

1" x 6" x 0.1" with holes drilled at 1", 2", 4", 5". Strapping **only** required when boxes are two high or more.

1" Robertson screws x 32

## 1- Unpacking

### 4'x4' Kit Includes:

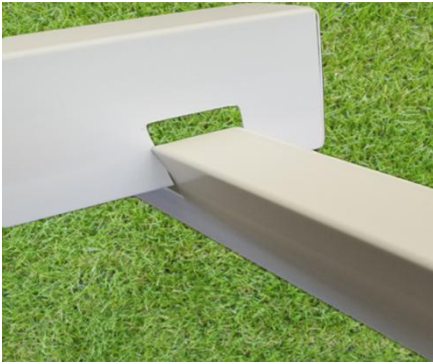

- 4 2x6 rails A
- 1 PVC Glue B
- 16 Screws C
- 4 box extension straps D
- 8 rail caps E

## 2- Glue caps on end of rails

Place a dab of the PVC glue on the outside tabs of each side of the rail cap and fit cap tightly onto the end of the rail. Wait to dry.

### 3- Inter-lock rails together

**A**

**B**

**C**

If multiple kits are purchased the beds can be made into any design by locking them together in different directions. They also can be stocked up to 3 layers high using the extension straps as shown.

### 4- Fill with dirt and enjoy

There is no need to add a liner in the garden bed as the vinyl is completely safe for growing vegetables. The 4'x4' Garden Bed uses approximately 0.5 cubic yards of soil filled to the top edge. You may choose to use less soil, adding potting soil or manure to increase mineral and fertilizer levels in your soil. To maintain the vinyl, simply spray with a garden hose to wash off any dirt or dust. If there is a spot that is stubborn, simply use a little dish soap and water with a cloth, rinsing when clean.
